

IMAGE TRANSFER TECHNIQUES:

Trace the pattern using a **LIGHTBOX** or **WINDOW**, with a water soluble pen. Sprinkle with water to remove remaining pen marks when embroidery is complete.

Trace the reverse pattern onto paper using an **IRON-ON TRANSFER PENCIL**. Place the paper pencil side down onto chosen fabric and iron as directed by manufacturers instructions.

Print a reverse version of the pattern onto **TRANSFER PAPER** and iron onto fabric as per manufacturers instructions.

Trace the pattern onto **TISSUE PAPER** or thin paper with a pen or pencil. Pin this in the desired position on the fabric and then sew on top of the paper. Once completed sewing gently remove the paper. This can be fiddly and tweezers may be required.
